

HAIGH

Introducing Panaway® M1 The temporary bedpan disposal system

SUPPORTING DIGNITY AND HYGIENE IN THE HOME

Dignity in the home when faced with adversity or illness is something we all have a right to expect. When our ability to cope with the most personal aspects of our lives is challenged, it can result in unwarranted distress and anxiety.

If you – or someone in your care – is bedridden, recovering from invasive surgery, an accident or major injury – mobility may be affected. Going to the toilet can be a challenge – if not an impossibility. Bedpans and urine bottles may become a very real part of day-to-day care.

Haigh's Panaway® M1 offers a waste disposal system that provides a discreet, dignified solution to help with toileting that is simple and cost effective. Haigh's macerators are established in the NHS. Panaway® M1 brings this to the home in a suitably compact package, leading the way in performance, versatility, and ease of use. Hygiene, efficiency and reliability are at the heart of its design.

Convenience without compromise

Panaway® M1 gives you the benefits of an NHS-proven approach to toileting, in your own home.

- Compact and versatile, it can fit – and be wheeled – into the most convenient location in your home
- Removing stress and making life more pleasant for carer and recipient of care alike.
- A temporary – or longer-term solution – depending on the requirements

Simple, discreet and hygienic

Disposable pulp products and the contents* are simply placed into your conveniently located Panaway® M1.

- Easy to set up, Panaway® M1 is supplied with all fixtures and fittings required
- Intuitive to use: open the lid, insert the waste and close the lid – the system automatically starts
- Fast, efficient and quiet, the Panaway® M1 takes less than a minute per cycle

** the machine can dispose of the pulp container, liquid contents, human waste, tissue and macerator-friendly wipes*

Economical and energy efficient

Discreet and easy to use, with clear visual instructions, the Panaway® M1 aims to make the life of all involved as pleasant as possible.

- Panaway® M1 uses approximately the same amount of water as flushing a toilet
- Paper pulp is eco-friendly, and no hot water is required for sterilisation
- All-inclusive support options are available for additional peace of mind

“

I would recommend the Panaway to anyone supporting an immobile loved one at home. I'm not sure what we would have done without it!”

Private client (carer)

Benefits of Panaway® M1

FOR RECIPIENTS OF CARE

- Reduces risk of infection and cross-contamination
- Preserves patient's dignity
- Supports discreet and fast waste disposal
- Quiet: can be used at night with minimal disruption

FOR CARERS

- Reduces risk of infection and cross-contamination
- Requires minimal training as straightforward to use
- Removes reliance on third-party carers
- Bacteria suppressing, with easy to clean ergonomic design
- Cost effective, energy efficient and environmentally friendly
- Reliable, flexible, compact
- Easy to install (needs only a cold-water tap, 240v power supply and drainage)
- No expensive maintenance required
